

Una vez corregido el código ya pasa el test:

```
39
40
41     /**
42      * Test of devolverBuleano method, of class Buleanos.
43      */
44     @Test
45     public void testDevolverBuleano() {
46         System.out.println("devolverBuleano");
47         boolean a = false;
48         boolean b = true;
49         Buleanos instance = new Buleanos();
50         int expectedResult = -1;
51         int result = instance.devolverBuleano(a, b);
52         assertEquals(expectedResult, result);
53     }
54
55 }
56
```
